Economic/MilitaryIndustrial and military installations north of MISKOLC

1. Attached is a plan showing certain industrial and military installations in the area north and north-west of MISKOLC.
2. The two most notable features are:-
 - (a) A large dump for supplies of iron, coke and scrap metals reached by a branch line from the small station near MISKOLC airfield. Included in the materials stored here is Russian iron-ore of only 15% purity. The dump is about 5 kms. in length but is only a narrow strip on either side of the line.
 - (b) A closely guarded factory 3 kms. west of SAJOBABONY, and connected by a single line railway to the main line at SAJOECSEG, 7 kms. away. This branch line was built in 1949 when the factory was built. There are great numbers of Russians at this factory and they have a housing-estate near SAJOBABONY village. The factory, officially called the "Artificial Fertiliser Factory" employs Hungarian workers from SAJOSZENTPETER, slightly to the north. The Russians are in complete control of the factory, which is reported by workers there to be engaged on the making of munitions.
3. Other features are:-
 - (a) A wire factory.
 - (b) An oil refinery.
 - (c) A brick-yard.
 - (d) A maintenance works for agricultural machinery.
 - (e) Flour-mill.

All of these are close to MISKOLC-GOMBORI railway-yards.

4. It is of interest to note [] going to and from the ammunition factory near SAJOBABONY, are always covered, and often bear a paper sign in the form of equilateral triangles. They were coloured in several ways, e.g.:-

- 2 -

(a) Inner triangle yellow, middle one white and the outer one red.

(b) Inner triangle white, outer one red (only two triangles).

No writing appeared on this sign but another sign consisted of an oblong piece of yellow paper with Russian written on it,
